Work History

End-to-end Web Specialist (Dev & QA) - Art of Violin Aug 2025 - Present | 7 mos
- Executed full-cycle QA testing across mobile/desktop, ensuring zero-defect launch.
- Architected custom Business Website CMS using ACF; achieved 95+ PageSpeed score through asset optimization.

Electronics QA & Hardware Testing - Powershield Limited Sep 2022 - Dec 2022 | 4 mos
- Validated soldering quality on PCBs using Kurtz Ersa Versaflow; maintained zero-defect output.
- Enforced quality control protocols on the assembly line, identifying and rejecting defective units before final chassis integration.

Post-Production QC & Editor - Hapfilm NZ Limited & DG Jul 2021 - Present | 4 yr 7 mos
- Performed rigorous QC on deliverables; validated export specs for broadcast compliance.
- Managed data integrity for multi-terabyte project archives, ensuring redundant backups and organized version control.

Quality Assurance Projects

Ticketer QA Project
- Wrote 21 high-value test cases, identifying and reporting a critical logic defect in the Kanban flow.
- Executed 12 reusable MySQL queries and captured 52 database snapshots to verify strict UI-to-DB data persistence.

Boba Business Management QA Project
- Wrote 20 test cases covering edge scenarios, identifying two major state-management defects.
- Validated persisted state using 49 localStorage snapshots and recorded 19 step-by-step video proofs for developer reproduction.

Stripe API QA Project
- Built a Postman collection with 35 API requests, capturing 106 artefacts to verify payment lifecycle contract compliance.

Education

- **ISTQB Certified Tester Foundation Level (ASTQB)**
- **Certificate in Applied Software Development from Dev Academy (NZQA level 6)**
